

## Green Power Partnership

### Fortune 500 Challenge: as of January 8, 2008

The Green Power Partnership works with a wide variety of leading organizations — from Fortune 500 companies to local, state and federal governments, and a growing number of colleges and universities. The following Top Partner Rankings highlight the annual green power purchases of leading organizations within the United States and across individual industry sectors.

These green power purchases help reduce the environmental impacts of electricity use and support the development of new renewable generation capacity nationwide. Purchase amounts reflect U.S. operations only and are sourced from U.S.-based green power resources. Organizations can meet EPA purchase requirements using any combination of three different product options (1) Renewable Energy Certificates, (2) On-site generation, and (3) Utility green power products.

Purchase figures are based on annualized Partner contract amounts (kilowatt-hours), not calendar year totals. These rankings are updated on a [quarterly schedule](#). Find out how your organization can [partner with EPA](#) today! To view a top partner list, select from the chart below:

National Top 25	100% Purchasers	Top 10 Retail	Fortune 500
Green Power Communities	Top 10 Federal Government	Top 10 Local Government	Top 10 College & University

Annual Green Power Usage (kWh)	GP % of Total Electricity Use*	Organization Type	Providers	Green Power Resources
1. <a href="#">Intel Corporation</a>				
1,302,040,000	46%	Information Technology	Austin Energy, PNM, Sterling Planet	Biomass, Geothermal, Solar, Wind

In December 2006, EPA challenged Fortune 500 Corporations to collectively exceed 5 billion kilowatt-hours green power purchasing by year end 2007. The companies listed below stepped up to the plate and helped EPA exceed its goal by 130 percent. These purchases avoid the equivalent carbon dioxide emissions of more than 670,000 average American homes annually. As of January 2008, EPA kicked off its second Fortune 500 Challenge, which will conclude at the end of 2009.
